C. T. McCleery—Market Administrator

WISCONSIN'S WELCOMED WINTER GUEST

CURRENT SEASON RECORDS

FEBRUARY 1967

Nearby Differential Issue Dead

Provisions in the New York—New Jersey milk order for paying farm differentials to producers in nearby area are being dropped, the U.S. Department of Agriculture announced last week. USDA went on to say that the Solicitor General will not seek an appeal to a November decision by the Circuit Court of Appeals.

A similar case is pending in the Massachusetts—Rhode Island milk order, and it is being assumed that it will not be appealed either. Thus, nearby milk price differentials in federal milk orders are a thing of the past.

Major pressure has been placed on the U.S. Department of Agriculture to fight the issue before the Supreme Court, and USDA announced some time ago that it had asked the Department of Justice to appeal the case. However it was reported last week that Solicitor General Thurgood Marshall has informed dairy groups that the decision is so strong there seems to be no point in trying to appeal to the U.S. Supreme Court.

Private interests probably will seek to carry on the appeal without support from the federal government.

Following the November 18 court decision and pending the outcome of a possible appeal to the Supreme Court, the Circuit Court of Appeals ordered the nearby differential monies in the New York—New Jersey order to be placed in escrow by the market administrator. Later the same action was taken on the New England order.

PROVISION TERMINATED

USDA said it has not been informed that there will be no appeal. Accordingly, the nearby differential provisions were terminated, so that monthly blend prices to producers, starting with January milk, will be computed without the nearby differentials.

Action will be taken, said USDA, to distribute among dairy farmers serving the market the money held in escrow, amounting to approximately \$653,000.

The Audit Function of Federal Milk Market Administrators

H. L. Forest, Director, Dairy Division, AMS, USDA

(continued from previous issue)

Records Checked

A market administrator's audit and investigation to verify the accuracy of reports usually includes a mathematical check of the pounds of milk and butterfat received from producers. Auditors verify, on a sampling basis, summary information on such receipts by examination of original records prepared by the person who picks up the milk at the farm or first receives it at the plant. Many market administrators test producer milk for butterfat in their own laboratories and check the results against the tests reported by the handler when such service is not performed by a cooperative association. Payments to individual producers are verified by the examination of canceled checks or other evidence of payment.

The auditors satisfy themselves that all other receipts have been reported by the examination of plant records and other documents. In many instances receiving operations at the plant are observed and compared with information recorded in the plant records.

Auditors verify the utilization of skim milk and butterfat in much the same way. They check reported information by examination, again on a sampling basis, of original records prepared by the individuals responsible for the action and trace the information on the original records to summary records. Handlers' employees are interviewed, plant operations are observed, and reconciliations are prepared.

The verification of volumes of milk used to produce manufactured milk products is accomplished by a survey of operations, by examination of original production records, and by accounting for the products manufactured. The auditors' experience and knowledge of the product and processes involved are useful tools in evaluating the reasonableness of the yield of manufactured products. Laboratory analyses of manufactured products are often made and the results are evaluated in conjunction with verification of reported utilization of milk and milk products.

(continued on page 8)

* Subject to location differentials where applicable. In the case of members of approved cooperatives, these prices are subject to the deductions authorized by the associations. The prices listed do not include any premium payments which may be paid by handlers and which may bring actual payments in excess of the minimum requirements.

WISCONSIN FEDERAL MILK ORDER BULLETIN

PUBLISHED MONTHLY BY
Federal Milk Market Administrator
4920 West Burleigh Street
Milwaukee, Wisconsin 53210

FOR THE
MILWAUKEE, NORTHEASTERN and MADISON MARKETING AREAS

This bulletin is primarily to provide producers who are not members of cooperative associations with market information in accordance with §1039.74 of the Milwaukee Wisconsin marketing order, §1045.75 of the Northeastern Wisconsin marketing order, and §1051.77 of the Madison Wisconsin marketing order.

COMPARISON OF DAILY PRODUCER DELIVERIES TO DAILY CLASS I UTILIZATION

HAVE YOU HEARD

United States District Judge James E. Doyle Friday dismissed the Federal Milk Marketing order case that the Elroy Cooperative had brought against Secretary of Agriculture Orville L. Freeman.

The case, which has been in the Western District court since late December, involved the cooperative's request that the court issue injunctions preventing Freeman from enforcing changes in the Tri-State Milk Marketing Order involving Elroy's market at Athens, Ohio.

Doyle dismissed the case for lack of jurisdiction, which was essentially the argument offered by government attorneys when the case was heard.

* * *

Members of the Columbus Milk Producers Cooperative Saturday voted to affiliate with Pure Milk Ass'n. (PMA) in a marketing arrangement to maintain their Grade A milk market in Chicago.

* * *

Grade A producers of the Elroy Cooperative Creamery, at a recent meeting favored a plan to market its milk through the Hiawatha Valley Dairies Cooperative at Sparta.

* * *

George Florin and Charles H. King have sold Elroy Sanitary Dairy after 23 years of operation.

* * *

(continued from page 3)

THE AUDIT FUNCTION OF FEDERAL MILK MARKET ADMINISTRATORS

Market administrators review financial records to substantiate the receipts and sales recorded in quantitative records. This review of financial records is not limited to the general ledger but includes general journals, subsidiary journals, bank account records, canceled checks, tax records, and other financial records which are maintained. In some instances, circumstances require regular examination of financial records and, in other instances, circumstances permit less regularity in their examination.

An audit is not concluded until the market administrator or the person assigned the audit review is satisfied that the handler's report is complete and accurate or that all adjustments found necessary by the audit have been made. Even after an audit is concluded and appropriate adjustments made, information obtained in a subsequent period may necessitate reopening the audit.

(to be continued)
